**DETAILED ACTION**

1. This action is in response to the Board Decision received on June 30, 2008. Upon further considerations, a new grounds of rejection is introduced below and approved by the TC 3700 director.

***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 26-31 are rejected under 35 U.S.C. 102(b) as being anticipated by Okamura et al. (USPN 4,339,983).

In reference to claims 26-31, Okamura et al. discloses a stack (CD; figure 19) of hangers comprising: a plurality of hangers aligned parallel, along a single line, wherein an opening exists between each hanger; each hanger having a shoulder (U) spaced from a web (9), the web (9) extending between a pair of legs (10a, 10b), and a barbed member (15a, 15b) extending out from each leg (10a, 10b); one or more shearable tabs (23) extending between, and attaching, adjacent ones of the plurality of hangers.

4. Claims 37-39 are rejected under 35 U.S.C. 102(b) as being anticipated by Anstett (USPN 4,220,070).

Regarding claims 37-39, Anstett discloses a stack of hangers comprising: a plurality of hangers 10, each having a web 12 extending between a pair of legs 14, the legs 14 extending outwardly from the web 12 in a direction perpendicular to the web 12; a barbed member 21

extending out from a shoulder of each leg 14; and one or more shearable tabs 13 extending between and attaching adjacent hangers (figures 1-3 and 5-8), wherein the tabs 13 are coplanar with the web 12; and a feature 15 that facilitates shearing of the tabs 13.

### ***Conclusion***
